

Dear guests,

We have prepared a new Wine List of carefully selected Serbian wines for you. During the selection, we were mainly focused on encompassing indigenous varieties, renowned wine growing regions and certain less-known wineries with great potential that we believe you will love.

We also added a few wines from our beloved Mediterranean.

You will surely notice that we have focused on varietal wines, and less on coupage wines, so that some of the varieties can be tasted in their original form. Also, you can taste over 20 different wines and champagne types in a glass to complete your gastronomic experience.

We would be glad to help and provide suggestions during wine selection.
